April 2021

Dear Parents,

As part of our state license renewal process (every 3 years), we are required to test water samples for lead and copper. Samples are collected from water outlets that a child or staff member have access to. Upon completing this year's sampling it was found that one drinking fountain in the 2nd floor hallway tested above the 15.5 micrograms/liter limit for lead.

While the children do have access to this fountain, *they do not use it*. It has been our standard practice for well over a year that the children only drink bottled water or water from our water cooler, which tested well below the limit.

This water fountain has been marked **Do Not Use** and I've spoken to all teachers about this issue. When this fountain was tested 3 years ago, during our last renewal process, it tested well below the limits. A possible reason for the higher levels this time could be lack of use. We will be retesting it ASAP and will provide you the results. While we await the results of the re-testing, we will use only bottled water for drinking and food preparation.

Attached are the full results of this year's testing.

Please let us know if any questions.

Thank you.
